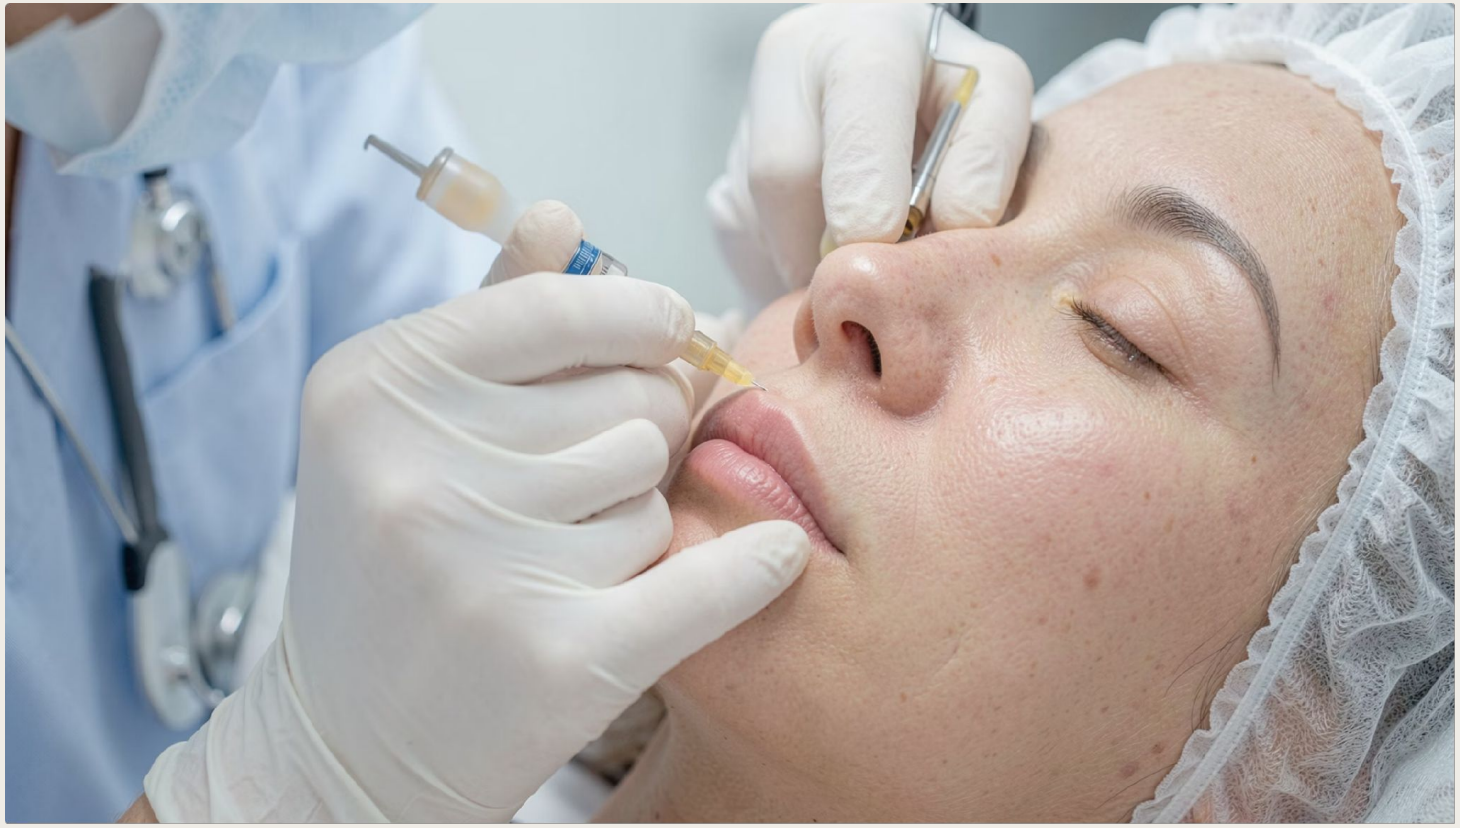
Best Botox Treatment in Indore

Natural-looking wrinkle reduction with advanced Botox techniques — tailored to your facial anatomy for subtle, balanced results.

AESTHEVA ADVANCED AESTHETICS



UNDERSTANDING BOTOX

What Is Botulinum Toxin Treatment?

Botox (Botulinum Toxin Type A) temporarily relaxes specific facial muscles responsible for expression lines caused by frowning, smiling, and squinting. Administered in precise micro-doses by trained dermatologists, it smooths wrinkles without creating a frozen appearance.

Non-Surgical

Quick Procedure

FDA-Approved

Minimal Downtime

Advanced Botox Techniques at Aestheva

Aestheva uses advanced injection techniques designed to match Indian facial anatomy and individual aesthetic goals — delivering refined, natural outcomes.

Classic Botox

Traditional wrinkle softening for dynamic expression lines

Baby Botox

Lower doses for ultra-subtle, natural refinement

Micro-Botox

Improves skin texture and controls excess oil

Preventive Botox

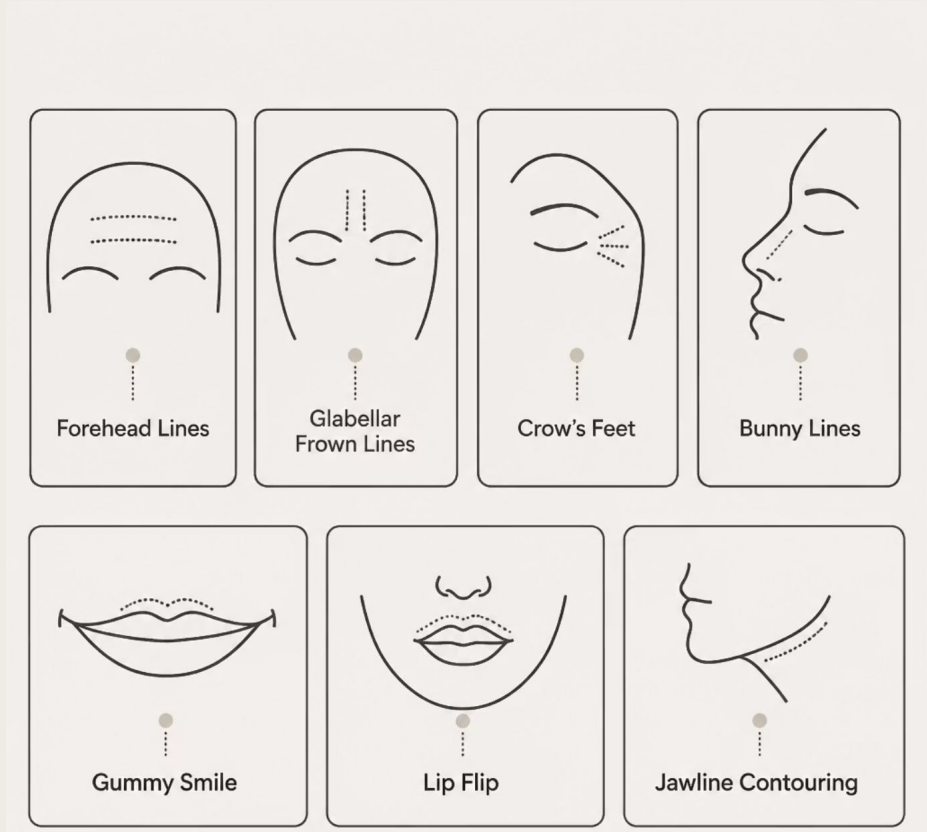
Stops new lines from forming before they deepen

Nefertiti Lift

Defines jawline and smooths neck bands

Treatment Areas

Botox addresses multiple cosmetic and functional concerns. Areas are selected based on facial assessment and desired outcomes.



Medical Applications

→ Hyperhidrosis

Excessive underarm sweating

→ Jaw Clenching & TMJ

Facial tension and teeth grinding relief

Why Botox Is So Popular

Botox delivers visible rejuvenation without surgery, scars, or prolonged recovery — results look refreshed and entirely natural.

15–20 Minute Procedure

Quick in-clinic treatment with no downtime required

Preserves Natural Expressions

Smoother skin while keeping your personality intact

Long-Lasting Results

Results typically last 4–6 months with regular maintenance

Boosts Self-Confidence

Improves facial harmony and enhances how you feel

IDEAL CANDIDATES

Is Botox Right for You?

Botox suits a wide range of individuals seeking wrinkle reduction, preventive anti-aging, or relief from functional concerns. A detailed consultation helps determine the ideal approach.

Dynamic Wrinkles

Lines caused by facial movement

Preventive Care

Adults in their late 20s–30s

Non-Surgical Rejuvenation

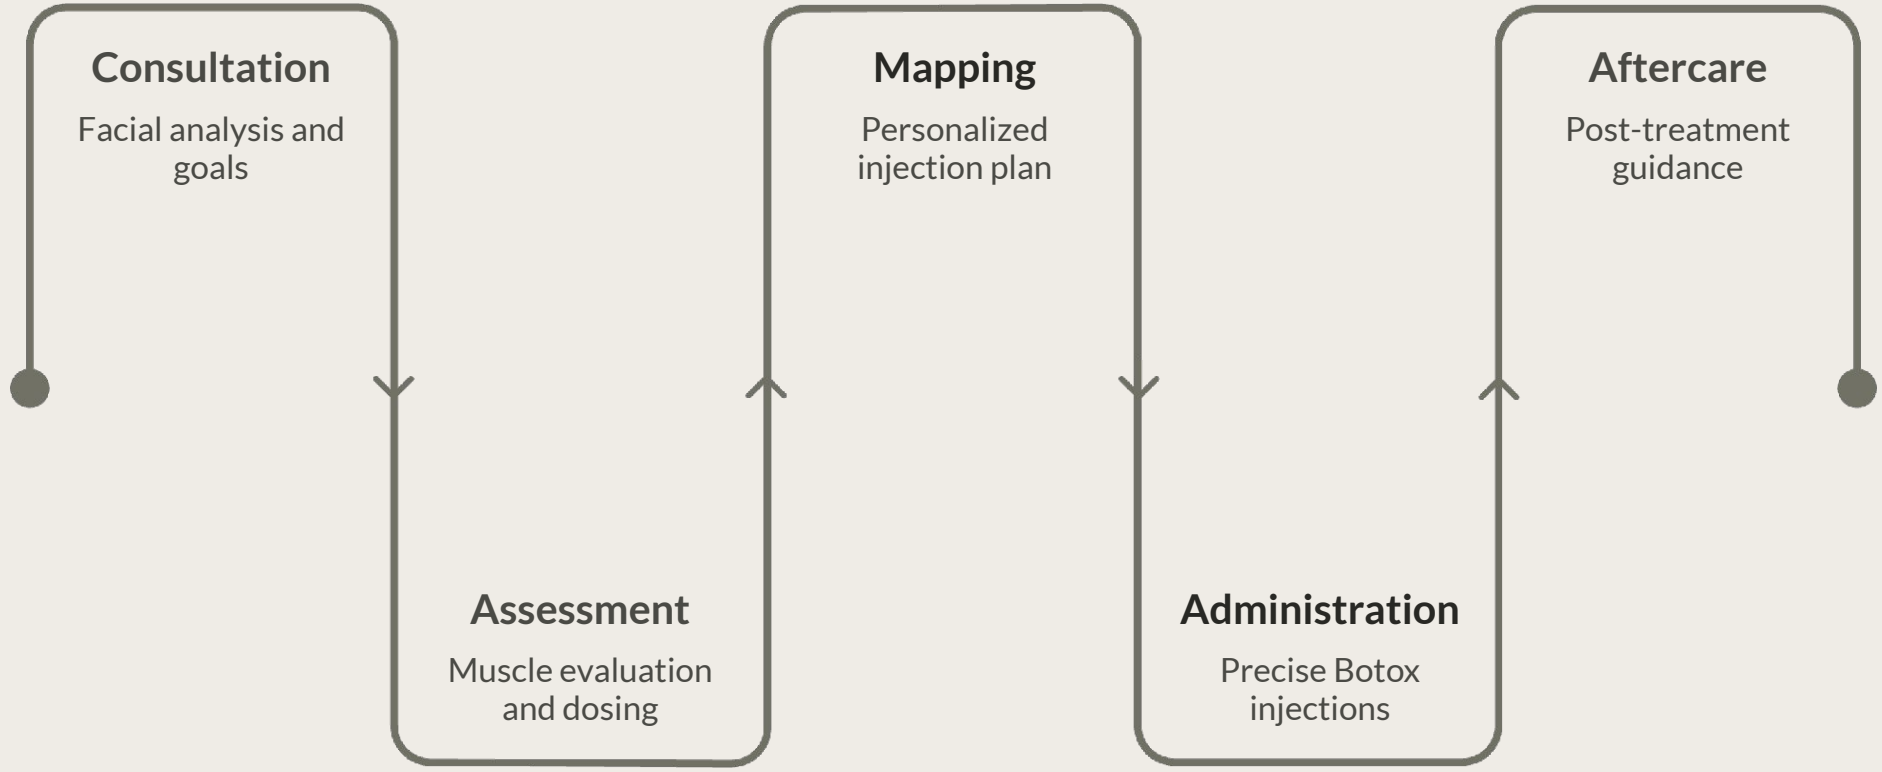
Men and women seeking subtle results

Functional Concerns

Excessive sweating or jaw tension

The Aestheva Approach

Every treatment begins with a comprehensive facial analysis to ensure safe, personalized, and balanced results. Consultation first — always.



Our structured five-step protocol ensures that every patient receives a treatment plan as unique as their face — prioritizing safety, precision, and natural outcomes.

Results & Recovery

Initial improvements are typically visible within **3–5 days**, with full results developing by approximately **14 days**. Results vary based on treatment areas and individual factors.

Results generally last **4–6 months** with regular maintenance. Most patients resume normal activities immediately after treatment.

Softer Wrinkles

Smoother Skin

Refreshed Look

Natural Expressions
